

### *The Next Steps*

The next activity the project needs to complete is the land referencing of potentially affected properties that may need to be included in the Transport and Works Act Order documentation.

The study area for the land referencing is larger than we anticipate the final limits of affected land to be to ensure we capture all relevant information.

Our team will be in contact over the next few months should your property fall within the limits of our study area.

Below is the indicative programme for the development of the scheme.
